digital whiteboard

The UTD digital whiteboard is a space to collect images, ideas, and research. It is a virtual space open to public dialogue and group collaboration. The whiteboard facilitates expression, collective communication, and community.

■ Applications

digital whiteboard

Potential applications

- Business meetings
- Brainstorming sessions
- Classroom discussions
- Lectures

Features

The screenshot shows a digital whiteboard application window. The main workspace contains the text "digital whiteboard" in a large font, with "ATEC UTD" in a smaller font to its right. Below this, there is a grey rectangular box containing the text "ATEC 6351 graduate class S08" and "July 14, 2008 8:35 am". To the left of this box are two small colored squares labeled "working" (green) and "idle" (red). Annotations with arrows point to these elements: "working status" points to the "working" and "idle" squares, "group tag" points to the grey box, and "date mark" points to the date and time text. On the right side of the interface, there is a vertical toolbar with various icons. A red arrow points from the text "private meeting room or side discussions" to a door icon at the bottom of this toolbar. Below the toolbar is a list of features, each preceded by a red dash.
